# Curriculum Instruction and Professional Development

## Supplementary Material – Justification form

### Program Overview

These supplemental informational books will support the TUSD elementary literacy program and the need for increased informational text sources to meet the AZ College and Career Ready Standards (AZCCRS).

Currently, TUSD elementary schools have a range of resources to promote informational reading – providing these STEM-related books will provide some consistency of supplemental and targeted texts to enhance the literature that is provided in the TUSD science units.

Using the sets as leveled readers will also support the need to differentiate reading instruction and promote the use of challenging text to develop and extend content knowledge.

### Program of Study

These STEM-related text sets will support the concept development of several disciplines, including social studies, science, mathematics, engineering, and technology. The variety of books in each set will allow teachers to utilize them in a variety of integrated unit lessons as well as during reading instruction.

The book sets include instructional lesson ideas that teachers can access to support lesson planning. Teachers will be able to use the books as suggested in the set or expand their use to match the needs of their students and content development.

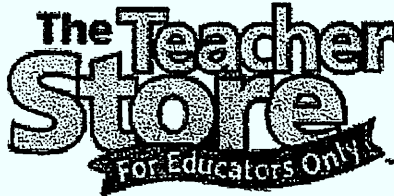

### Assessment and Instruction

TUSD teachers will be able to match the reading levels of these books to their students' reading level needs, allowing for differentiation of instruction and assessment. The books in the sets are already leveled so teachers will be able to easily accommodate student needs in several instructional formats – as independent reading materials, as guided reading texts to build students' reading skills, and as structured texts to build individual students' reading skills deficiencies.

Teachers will be able to use the suggested lessons included in the sets as well as utilize their own formative assessment strategies to determine student outcomes as identified in the standards.

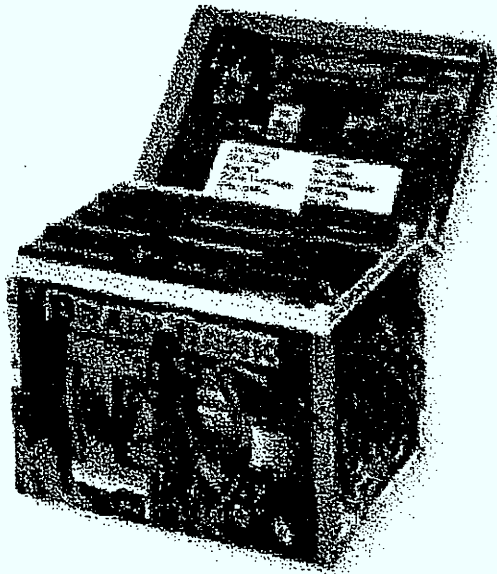

### Community Support

These text sets will be available at each school for Reading Seed and other literacy volunteers to access when providing targeted reading support to students. As previously noted, the text sets will offer additional leveled reading resources to promote differentiated instruction for students.
