

## **Center Classroom Equipment List**

The following lists are suggested equipment lists for the age groups mentioned and the number of children stated. The list is developed from opinions of various past and present child care providers, as well as from literature about operating a child care center. There are many factors in determining what equipment and supplies will be purchased, these lists are meant to be a starting point and guideline for child care providers, with the assumption that an individual provider will make adaptations as necessary or as seen fit.

Some important items are *not* included in these lists for the reason of keeping the lists to a reasonable length. Some of these items are: teacher resources, furniture for a teacher lounge area, first aid, office, kitchen, and housekeeping (sanitizing) supplies.
