Suggested Supplemental Resources Culturally Relevant US History and US Government

These courses are designed to teach US History and US Government from a particular viewpoint or perspective, but students should also have opportunities to evaluate authors' differing points of view on the same historical event or issue by assessing the authors' claims, reasoning, and evidence. It is generally recognized, however, that the serviceableness of the scale has hitherto been seriously limited, both by the lack of a sufficiently detailed guide and by a number of recognized imperfections in the scale itself. The Stanford revision and extension has been worked out for the purpose of correcting as many as possible of these imperfections

For Reston, "Dr. King touched all the themes of the day, only better than anybody else," while Malcolm referred to the entire March on Washington as "another form of the weakening, lulling, and deluding effect of so-called "integration." Within these pages, you will read H.L. Mencken on the Scopes trial, Hunter S. Thompson at Super Bowl Viii, Black Elk's perspective of the Massacre of Wounded Knee, and journal entries from a member of the Donner Party, among many other stories. They are by turns heartbreaking, chilling, mirthful, and exhilarating –and all will remind you that the story of the United States is born in the stories of all its people, famous and "ordinary" alike.

Who Are We?: The Challenges to America's National Identity

The author argues that America was founded by British settlers who brought with them a distinct culture, sincluding the English language, Protestant values, individualism, religious commitment, and respect for law. The waves of immigrants that later came to the United States gradually accepted these values and assimilated into America's Anglo-Protestant culture. More recently, however, our national identity has been eroded by the problems of assimilating massive numbers of primarily Hispanic immigrants and challenged by issues such as bilingualism, multiculturalism, the devaluation of citizenship, and the "denationalization" of American elites.

Critical White Studies: Looking Behind the Mirror No longer content with accepting whiteness as the norm, critical scholars have turned their attention to whiteness itself. The book addresses such questions as: How was whiteness invented, and why? How has the category whiteness changed over time? Why did some immigrant groups, such as the Irish and Jews, start out as nonwhite and later become white? Can some individual people be both white and nonwhite at different times, and what does it mean to "pass for white"? At what point does pride in being white cross the line into white power or white supremacy? What can whites concerned over racial inequity or white privilege do about it?
