

 Tucson, Arizona GOVERNING BOARD POLICY	POLICY TITLE: Physical Activity and Wellness
	POLICY CODE: IHAM

Policy Intent/Rationale:

The Tucson Unified School District promotes wellness by supporting good nutrition and regular physical activity as part of the total learning environment. Wellness is defined as the dynamic state of achieving optimal well-being in all the dimensions of health: physical, mental/emotional, and social.

The District supports a healthy environment where children learn and participate in positive dietary and lifestyle practices. Schools contribute to the basic health status of children by facilitating learning through the support and promotion of good nutrition and physical activity. Improved health optimizes student performance potential.

The District supports a work environment where employees are encouraged to embrace healthy lifestyle choices, educational resources are provided, and information about wellness activities is available so that employees can serve as good role models for students.

The District shall provide a comprehensive learning environment for developing and practicing lifelong wellness behaviors.

The entire school environment, not just the classroom, shall be aligned with goals to positively influence a student's understanding, beliefs and habits as they relate to good nutrition and regular physical activity. A healthy school environment should not be sacrificed because of a dependence on revenue from high fat, high added sugar, low nutrient foods, and food and beverage sales in addition to meals to support school programs.

The District shall support and promote proper dietary habits contributing to students' health status and academic performance.

All foods and beverages available to students on school grounds before, during, and after the instructional day, except public events, should meet the District Nutrition Standards. Emphasis should be placed on foods that are nutrient dense per calorie. To ensure safe, nutritious foods, consideration of available foods and beverages should be based on national health initiatives, nutrient contribution, variety, appeal, safety, and packaging.

The District shall provide physical education and physical activity opportunities for students.
