---

To whom it may concern:

The fire and Safety Systems Department is declaring an emergency at Gridley Middle School. The fire alarm system has failed and is no longer functional. Without the fire alarm system a State Fire Marshal required fire watch must now be relied on for the safety of the students and staff and the public.

There are no longer parts or service available due to the age of the system and no longer supported by the manufacturer. This system needs to be replaced with an updated fire alarm system with voice to satisfy the State Fire marshal requirements for an educational occupancy
