

	REGULATION TITLE: Head Lice
	CODE: JLCC-R

Head lice are a common problem in the US contributing to absenteeism in school age children. They are spread by head to head contact and infestations can occur under the best sanitary conditions.

- The District will enforce a No Live Lice policy.
 - If a student is found to have live lice, the student will be sent home for treatment.
 - When an active infestation is noted and confirmed by live lice, parent contact will be made, preferably by phone and information will be provided through the health office.
 - Student will be re-checked for any live lice on return to school.
- Students should be allowed to return to school following treatment.
- The student will not be denied re-admittance to school if nits (eggs) are present.
